REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The claim is allowable because the prior art fails to teach a method comprising the step of opening the lids of a channel to allow *the central portion* to be entrained along a conveyance direction *into a processing line*; and stopping a lateral cutting of at least one edge and cutting the central portion transversely to the conveyance direction whereby *the edge portion entrain said central portion through the channel into the processing line* as set forth in claim 15.

The combination of Jobst and Sumida et al. teaches the method of including the step of cutting off at least one edge laterally from the central portion along a conveyance direction (Fig. 3); cutting at least one edge along a direction transverse to the conveyance direction (Fig. 10B); taking up the at least one edge through the edge channel (Fig. 11A); securing the at least one edge in a pulling unit (Fig. 11B); cutting the central portion transversely to the conveyance direction (Fig. 1 and 10B); forming a loop of edges at the vicinity of the edge channel (Fig. 11A); cutting the central portion ahead of the channel and after securing the at least one edge (see Fig. 1); and opening the lids 41 of the channel (Fig. 2). However, The combination of Jobst and Sumida et al. fails to teach the central portion entrained along the conveyance direction into the processing line; and stopping the lateral cutting of at least one edge and cutting the central portion transversely to the conveyance direction whereby the edge portion entrain said central portion through the channel into the processing line.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
